Getting the most from
EG Papers®

How do they work?

The unique nature of EG ink receiving layer works to minimise dot gain thereby giving an extra sharp image and the most vibrant of colours. When used with pigment inks the images are waterproof and the final finishing process ensures scuff and scratch resistance. All EG papers are perfect with Pigment or Dye inks
EG papers are:-

- pH neutral 6.5 - 7.2, 100% acid free
- No optical brighteners
- Ideal for Giclée printing
- Totally pigment friendly
- HWSmooth - 100% cotton Rag
- Lignin Free
- Buffered with CaCO₃

Why should I use EG Papers?

The EG technology gives vibrant, archival, waterproof images with the widest colour gamut obtainable from pigment or dye inks. The papers have a heavyweight sumptuous feel and quality and are available in surfaces from ultra smooth to naturally textured. "Lite" versions of these quality papers are available to save money without sacrificing quality and double sided options are ideal for portfolio work. EG papers are supported by an after sales service that is second to none with all the in-house colour management know-how from a company that provides you with absolutely **FREE OF CHARGE Custom ICC Profiles** for all Fotospeed branded inkjet papers.

FREE Custom ICC Profiles.

Any Fotospeed branded paper entitles the user to **FREE CUSTOM ICC PROFILES** from Fotospeed. These are **NOT** generic profiles (we do not do these) but are custom/bespoke profiles written for your scenario from test charts provided by us and printed by you and sent to us for profile creation. It is all really simple - all you do is contact us either by phone on 01249 714555 or by email - info@fotospeed.com and we will guide you through it. Imagine suddenly getting the correct colours everytime, always for no cost with Fotospeed papers. All profiles supplied by Fotospeed are produced in house - we have a colour management department and we take responsibility for your printing needs when you buy your papers from us.
